Sep 2019 - Present
Advisor: Mari Ostendorf,
 - Created a new model for **LMs to perform structured predictions on task-oriented dialogues with schema-driven prompting** and achieved state-of-the-art results on a competitive dialogue state tracking task.
 - Proposed an **in-context learning framework for dialogue state tracking with an intent-aligned retriever** and achieved state-of-the-art few-shot results on a competitive dialogue state tracking task.
 - Built a **human-in-the-loop framework for generating long and natural conversations by leveraging instruction-following language model**. Showed effectiveness in improving state tracking on information-gathering dialogues.
- **Google Brain Research** **Seattle, U.S.**
Jun-Dec 2022
Advisors: Ankur Bapna, Yu Zhang, Tara Sainath,
Built a family of **multimodal speech-text long-context language models with quantized representation learning** and demonstrated improvements on long-form ASR and spoken question answering tasks.
- **Google Machine Translation Research** **Seattle, U.S.**
Jun-Dec 2021
Advisor: Melvin Johnson,
Proposed a new **pretraining objective for multilingual language models to comprehend and generate long documents**. Achieved state-of-the-art results in document translation tasks and analyzed effects of data quality and pretraining objectives for multilingual language models.
